

Neglect of enhancing intellectual ability in our education system.

## Outline

### 1. Introduction

**Thesis Statement:** The education system in Pakistan, which determines the future of a nation, is not suitable for enhancing the intellectual abilities in students. The country is in dire need of reviving its outdated education policies. However, it could be achieved by encouraging students to improve their skills and teachers to boost students' abilities.

2. Why the enhancement of intellectual ability is necessary in our education system.

3. Factors which are <sup>responsible for</sup> suppressing <sup>the</sup> intellectual ability in students.

a) Teachers are strictly bound to course content.

b. Students are not engaged in activities which enhance their abilities.

c. Flawed education system which tests only the memory storage capability.

d. No good policy regarding course content.

e. Cramming is more encouraged than critical thinking abilities.

f. Less efficient teachers in our education system.

4. Impacts of neglecting intellectual ability in our education system.

a. Leaders who come out of this system are not eligible for good governance.

b. Pushed backward in every field of life.

c. No advancement in technological use technology.

d. Students face disappointment when they apply for jobs, hence,

increasing suicidal attempts.

e. Rise of unemployment further aggravates poverty.

5. Way forward for enhancement of intellectual ability in our education system.

a. Students should be encouraged in advance games, drills and tasks

b. Teacher should be like a supervisor, not a spoon-feeder

c. Encourage more friendly environment in classrooms

d. Upgrade & syllabus contents and examination system.

e. Engage students in research work

6. Conclusion.
