

Pakistan's economy — in danger (Reason)

VERY GOOD

Less Foreign Direct Investment (FDI)

KEEP PRACTISING

Pakistan has been facing severe economic condition — FDI is also a chief reason of it. Less FDI has contributed in Pakistan's poor economy badly. Pakistan's FDI is only 2pc as compare to Singapore's FDI that is 92pc against it. Because of good governance in Singapore, rules of laws are followed whereas Pakistan lacks such rules of laws. Hence, Pakistan attracts less countries' FDI that as a result brings no or even less FDI to the country. Therefore, less FDI is also a major burden on already existing poor economy of Pakistan.

Pass: 02
Pakistan's social conditions need
reformation

(Solution)

a) Pakistan needs to increase literacy rate
Pakistan's social conditions need
reformation by increasing or improving its literacy
rate. No doubt, Pakistan is one of the most
populated country in the world today and hence,
needs to improve its social status. But unfortun-
ately, Pakistan is less focused towards quality
of education. Public schools have almost lost their
value especially in rural areas. More illiteracy
ratio is contributed from Sindh. According to
Pakistan Social and Learning Measurement Survey,
(2019-2020); boys' ratio $\frac{5}{16}$ and girls' ratio
 $\frac{7}{16}$ remained out of schools. This illiteracy
ratio contributed a lot in social conditions
destruction. Hence, it seems clearly Pakistan
needs a strong effort to reform its literacy
ratio to overcome social evils.
