Essay

Argumentative Essay

Topic: Expanding information Technology – a blessing or a curse?

outline

1. Introduction
2. Why expanding information technology is a blessing (Thesis)
3. If considered a blessing, it is not for everyone (Anti thesis)
4. Information Technology has provided far more benefits to mankind to outweigh its disadvantages (Synthesis)

	Thesis	Anti Thesis	Synthesis
T.S	(2a) Communication has been immensely facilitated. " " "	(3a) Negative activities have also increased due to ease of communication	(4a) Evil minds are not limited to communication through IT only.
S.S 1	Expanding information tech is a blessing because it has facilitated communication for all. " " "	Expanding IT also many negative impacts on our li like as, Hacking, cyber crime etc.	has Evil minds, Hackers have many other Platforms for doing bad deeds instead of IT only.
S.S 2	When used responsibly and ethically, IT can be a powerful tool for improving our lives and society.	Mobile and computer data's are leaked which have many bad effects.	If everyone used IT responsibly there is no any harm for any person.

(red annotations: "has", "Such as?")

S.S 3 It has made communication faster and easier, allowing people to connect each other instantly across long distances.

The constant use of technology can lead to social isolation and disconnection from the physical world.

To overcome the social isolation, it is very important to use technology responsibly and to manage its negative impacts

S.S 4 The messages via any gadgets that a man sends and receives is due to information technology.
"   "

• Hackers can hack our cell phones and mobile apps and shared wrong messages and leaked our data.

in order to fully reap its benefits.

• As the expansion of IT brings new security risks, it is important to address these concerns in order to promote the growth of the field.

S.S 5 This has made it easier for people to stay connected with each other and has greatly improved the efficiency of communication.

• With the increasing amount of personal information that is shared online, it is becoming easier for companies and governments to track and monitor individuals.

• This can have serious consequences for privacy.

• It has greatly improved communication, increased access to information, and made many tasks and processes more efficient.
