

①

PAKISTAN IS RICH IN NATURAL RESOURCES
BUT POOR IN MANAGEMENT

Outline

① Introduction

Thesis statement:- Efficient management of the natural resources leads to the socio-economic development of any nation. However, Pakistan is blessed with natural resource but poor in management.

② Natural Resources of Pakistan

③ Causes of Poor Management

④ Impacts of Poor Management

⑤ Conclusion

→ Efficient management of the natural resources leads to socio-economic development of any nation. However, Pakistan is blessed with natural resources but poor in management. Natural resources in Pakistan are more you can not count them like the coal reservoir. The coal reservoir is the seventh largest

(2)

Coal reservoir of the world. It produces 180 billion tons of coal annually.

On the other hand, Allah almighty has ^{also} blessed

our country with water resources too. Indus water disputes, Tarbella dam, Mangla dam and Wazirabad dam through which we produce

thousands of mega watt energy to meet

our daily supply and demand necessities.

Thus, Pakistan is filled with natural resources but poor in management.

Natural resources in our beloved country can not be counted. The economy of

the nation can be ~~at~~ progress by means

of using the natural resources in a progressive way. Our country is blessed

with renewable and non-renewable resources

that we can not forget. Indus water

that dispute the coastal area of 2900 km.

(3)

Through these water disputes thousand of Mega watt energy is produced. Like wise, The Reko dic projects in Balochistan can change the destiny of nation. For example, The Sui gas field ~~was discovered~~ ^{biggest natural} gas field in Pakistan discovered in 1952. Its current production is 8.5 million cubic metres. Charming and amazing feature of this field can generate lot of income for our country.

The reasons behind the poor management of natural resources in Pakistan are lack of visionary leadership that like Quaid-e-Azam. The only leader of nation who thinks for the nation and for its generation. According to Nelson Mandela,

"Politician thinks for next election while Statesman thinks for next generation."

Same as the Pakistan it has too many ~~leaders~~ ^{politicians} but few leaders. On the contrary,

Lack of accountability and transparency is full of hopeless progressions. The Officials are corrupt and the funds of projects are kept in their pocket. And it results in poor management of resources.

As every problem has ^{some} ~~the~~ impacts also, The impacts of ~~poor~~ mismanagement of natural resources are versatile by means of poverty, inflation and energy crisis.

In Pakistan 40 percent people are living below the poverty ~~poor~~ line. The leaders and officials are corrupt and they are just behind the money and filling of their pockets. So, the poverty is root cause of all evils. After the independence of Pakistan 1947 till now the country has tarnish its image in front of the world.

(5)

The people living in Pakistan their lives has become ~~difficut~~ difficult due to mismanagement and implications of certain rules to tackle this situation.

In conclusion, ~~an~~ Efficient management of natural resources helps in progress of the nation economically and socially. The values of natural resources can only know by ~~develop~~ those ^{countries} who knows the utilization of natural resources for their development. The reason behind the ^{under} developing countries is that they are poor in management. Alternately, mismanagement has risen the flaws in the country that may be in the shape of unemployment, poverty and energy crisis. Proper utilization of resources is directly proportion to the effective management in the country.
