## 5. Conclusions

# Introduction:

invade militarily US always put sanctions and ~~or~~ which are seen ~~invade~~ <sup>arising</sup> over ~~on~~ The Countries economically, socially or politically ~~no above~~ <sup>crossing</sup> ~~its level~~ US afraid of that anyone <sup>being</sup> will contain and challenged its hegemony. In 19s when Russia was arising as a great power US attacked. Since 1990s US attacked on North Korea because ~~she~~ It is developing and US afraid of losing its superiority. ~~The~~ ~~EU~~ donot find any reason ~~she~~ <sup>at</sup> ~~are~~ always use force against others. The one who uses force is incapable of reasoning and arguments to justify his stand. He ~~one~~ uses force to be heard. It is as a result of lack of confidence and insecurities. Human is the only animal capable of reasoning although others having the faculty of memory and instructions in common with him. It is also represents the strength and confidence. People use force only when they have no other option and justification ~~for~~ something. The history is full of with false use of forces.

like Nazi Germany attacked  
on German people & despite  
their ideas and beliefs being at  
odds. Soviet Govt suppressed political  
dissent. In politics force is also  
being used to suppress the opposing  
parties. Many of characters in literature  
are shown as violent characters.  
But the power of reasoning is  
more than the force in history <sup>like</sup>  
Renaissance of Europe. In politics  
recent Iran-Saudi diplomatic ties  
In ~~years~~ research everything found  
only by reasoning. Reasoning is  
better than using force. But  
there are some conditions when  
use of force is justified. It  
is justified for a state to  
use force against the peace  
and prosperity of state. Many  
philosophers justified it. But in  
Pakistan higher authorities  
consider it is their right  
to use force and coercion  
against people.

## Conclusion:-

In a nut shell, someone uses force only when he have no justification. He afraid Due to lack of ~~tell~~ giving reasons and to convince. people one uses force and forcefully one convince others. It is not justified to use force. ~~&~~ except state. A state can use force for its sovereignty, ~~and~~ peace and prosperity. That's why, state make some department who are responsible to ensure peace in country. Therefore, using force is not justified anywhere one can use its brain to solve issues one must have to negotiate with other to solve issues not the force. State can only use force when it is inevitable to ensure peace in country.
