

~~Money is not the goal of life.~~

Everyone has different goals in life but money can not be the aim of a well educated, sensible and rational mind. It is the same case with a healthy person, if he likes balance food then it does not mean that purpose of his life is to just eat. Similarly, if one takes examples of Soldiers, Doctor or religious scholars; they all take salary of their job but money is not only goal of their life. Their priority is their work then there come question of money.

Title :-

Work Comes Rank First in Rational Mind
