

Paragraph Writing

Save Water, Save Life

Water is one of the essential elements on Earth. Without water, no life can survive. Most of the fresh water is wasted everyday, while all aquatic life, vegetation and other creatures need water to survive.

Today, water is being wasted in a greater amount. Many people are unfamiliar of its worth and value. Lack of awareness and the carelessness are the major reasons behind the wastage of water. It makes life possible on the planet Earth, the life without water is unimaginable.

It is now time to take some actions for preserving water and saving it from depletion. By indulging in continuous wastage of water, we are making our life tough to survive. Preserving water is the responsibility of every human living on Earth to lead a good and healthy life. Hence, Save Water, Save Life.
