Name: AYSHA HAFEEZ

ACADEMIC PARAGRAPH STRUCTURE

(Sub-heading: Nuclear challenge to world peace during the 21st century.)

Topic Sentence	There are several nuclear challenges to world peace one of the major ones is nuclear proliferation.
Explanatory or Reasoning sentence	Nuclear proliferation is the spread of nuclear weapons or fissile material to countries who do not possess them. This term is also used to refer to the acquisition by the non-state actors as well.
Supporting Point (1)	Nuclear proliferation is considered a threat because it can lead to low intensity conflicts between states because in order to compete with one another states would want to acquire weapons to show their power.
Example (1)	According to Gareth Evans, proliferation is a threat affecting world peace in a way that new states would keep on piling more stock with all the risks of deliberate or unintentional use that comes with it.
SP 2 (optional)	
Ex 2 (to be written if SP2 is given)	
Concluding Sentence	Nuclear weapons is the most terrifying threats and destructive weapons ever created (NRC ICRC, 2018) so proliferation is a big threat to world peace, the more countries acquire weapons, the more difficult it would be to maintain peace in the world. (No. of words <u>150</u>)
