

Q.No. 01Title: Objective of educationPrecis

The objective of education is to make a person useful by acquiring knowledge of various kinds. Knowledge can be classified into two things; the province of feeling and the province of intellect. The subjects of knowledge are bifurcated into science and matter of art. Rational happenings come under the umbrella of science while feel-able things come within the ambit of art. So the purpose of education is to develop the cognitive skills by working on the knowledge which is available either in the form of science or art.

Q. 02

Translation

A man deserves mercy, he-
the feeble soul- is entrapped in
flaws, errors, misfortunes, evils
and self-created challenges.

He fears to see the real
picture of his own in the mirror
of **this** soul. In order to get
rid of himself, he has kept
different hobbies and busy
tasks. He has not the
courage to look into his past.

If somewhat he gets a
few moments to see the past,
he tries to recatch those
memories which back his ego that

he was unmatchable ~~from~~ ~~the~~ since his
inception. But many regrets
are veiled under his

miracles. He does not want
to spoil the taste of
his present by memorizing them.

The man has to live

happily in every circumstance because the future is not predictable. However, the observer is watching his current situation merciful 'today'.

Q.03
