

Topic: Neglect of Enhancing Intellectual Ability in our Education System

OUTLINE

1- Introduction

Thesis statement: Despite its sheer significance, enhancing intellectual ability is neglected in our education system. This neglect is proving detrimental to the progress of our country in the long-run. Concerted efforts for the enhancement of intellectual ability in our education system will make a substantial difference.

2. Our Education system neglects enhancement of intellectual ability

3. Factors that cause the neglect of enhancing intellectual ability in our education system

- a) Cramming-based education system
- b) Focusing on securing grades
- c) Securing a good job: Main objective
- d) Out-dated curriculum
- e) Culture of plagiarism rather than innovative thinking
- d) Disapprobation of innovative efforts of students

4. Long-term effects of neglect of enhancing intellectual ability in our education system

- a) Incompetent degree holders
- b) Rise in unemployment
- c) No advancement in Science and Technology
- d) Inability to compete with the world
- e) Dependence on foreign professionals

and goods

e) Herd of blind followers

f) Inability to think critically

5. Ways to promote intellectual ability enhancement in our education system

a) Focus on real learning instead of grades

b) Updated curriculum according to the need of the hour

c) Encouragement of innovative ideas of students

d) strict action against plagiarism in research work

e) Government's patronization of institutes to introduce programmes to enhance intellectual ability

6. Conclusion

Neglect of enhancing intellectual ability in our education system

Intellectual growth should commence at birth and cease only at death (Albert Einstein). This line by Albert Einstein reflects the importance of intellectual ability enhancement throughout the human life. If a person does not grow intellectually, he is unable to question the world that exists around him; when he cannot question what already exists, he cannot create something novel. However, our education seems to ignore this fact as it neglects the intellectual ability enhancement. There are multiple factors that cause this neglect. First of all, our education system is cramming-based that focuses mainly on securing good grades and a fine job. Our curriculum is out-dated and it supports the culture of plagiarism rather than innovative thinking and its approbation. Consequently, this neglect has long-term negative impacts on our country. Our education system produces incompetent degree holders that cause rise in unemployment. There is no advancement in the science and technology sector that results in inability to compete with the world as well as dependence on foreign professionals and goods because our education system is producing a herd of blind followers that is unable to think critically. Therefore, there is a need to take several steps for enhancement of intellectual ability in our education system. First of all, our education system should focus on learning instead of grades, ^{and} curriculum should be updated regularly. Then, innovative efforts of students should be encouraged and government should patronize such institute that work for enhancement of intellectual abilities. Last but not the least, strict actions

should be taken against plagiarism in research. In a nutshell, despite its sheer significance, enhancing intellectual ability is neglected in our education system. This neglect is proving detrimental to the progress of our country in the long-run. Concerted efforts for the enhancement of intellectual abilities in our education system will make a substantial difference.
