lopic: Price Hike in Pakistan; the worst of all worries Outline : Introduction Thesis Statement: Although Pakistan is going through a lot of problems at the same time, Generic; be a bit nore specific in the worst of all is inflation. It has not only created new issues but also worsened the already existing issues. However, it can be solved through right reforms and permanent policies. 2. What has caused price hike in Pakistan? **Expand this** a- Slow down of economy as this is the b. Money depreciation main topic c _ Elite Oriented Policies d. Weak price controlling authorities

How price hike is proved to be worst of all worries a- Tight budget for policy implementation

The dead body of a forty years old who died while trying Hint towards the time it to buy some cheap flour was asking happened, month, year multiple questions from state authorities. Although blame was tossed over to mad crowd, the core issue called inflation still lingered there. Inflation, soaring of prices, in shorter period of time, how become the moun issue of Pakistan for the point few years Negligence and poor policy making along with many other factors are to blame. Whoever be blamed inflation is claiming life and destroy ing the social fabric of society Prepaying next generation becomes out of question when people cannot even get hold of bousic necessities. Inability to meet the prices of the you materials, (bus) causes businesses to shut down; and industries take a nosedue. All of this worsens the already worst issue of inflation. Fighting the inflation is not an easy task as many hard decision and difficult

approaches would be required. Although Pakistan is going through a lot of problems at the same time, the worst of all is inflation. It has not only created new issues but Into Para word limit has also worsened the existing ones is 220-250 However, it can be solved through permanent policies and right reforms. Inflation struck different economies in different ways and for different reasons. As for Pakistan, some global and many national reasons are to blame for inflation. Slowing down of economy is a major reason for it tuhich is globally caused by Likroune-Russia war The estimated growth of 5% of global economy slowed down to 2.2% for 2022, stated the November report of OECD? It is Because that Ukraine Russia war have skyrocketed the petroleum prices. This costlier fuel is translated into increased cost of rammaterials for industries ultimately burdering the consumer, So, it can easily be mountested that

Justify

slowing down of economy has placed its share well in the inflation causing distress to common people. Not only the slow down of economy but money depreciation how also contributed to inflation. Prices of goods go up as the value of Pakistani rupees go down with respect to dollar. Along with this disparity, prices of imported goods go up causing an inflation of prices in rupees. Pakistani Rupee how been deprivated from 182.96 PKR per 1 \$ as of april 2022 to 288.82 per per 1 \$ as of tapril 2023. This money depriciation has caused the general price hike of goods. Moreover, once the prices go up , they usually stuck there instead of falling back to the normal old price tag. The decrease of value of money has caused the prices to soare and reach this new height. Thus, inflation can be blumed on money depreceation

Inflation can be by global reasons and varied economic factory but it was mainly elite oriented policies. in Pakistan. the Pakistanis especially major property holders or huge industrialist closs not pay tax. As per FBR only 10.4% taxpayer are there Pakistan . Even after the realization of much needed reforms regarding network, only 1.3% increase could be materialized in tax to GDP ratio making it 10.4%. As the major chunk from direct tax, the only way out seems indirect taxes. the poor to bear the brunt of form of inflation. in the Moodys showed the disturb Give full names numbers of CPI reach with abbreviations to in brackets when using for the first prices of doubled time, later you can use only the abb year. elite tax would continuo be living hell through inflation

Brice hike in Pakistan how proved to be the werst of all worries for its for reaching impacts on governance, social fabric of society, strategic technologies and life y a person. Price hike in Pakistan hav impacted policy implementatton astrong with already low fiscal space for many important isector's As the prices of infrastructive sky rocketed. many policies halted for the lack of capital. For example, education is given only 2.5% of GADP. But, the infrastructure of schools was damaged because of floods in 2022. It becomes difficult to rebuild school along with maintaining the cost of other school in this inflation and economic crisis. Same is the case with other key departments like health It is difficult to even carry on already in process projects Let alone develop new projects. Brice hike has impacted adversely the govern ance in Pakistan making it much

than it already is. Price hike 18 causing political polarization to get more Link b/w worse in Pakistan. As the bell of Pakistan's reaching default is ringing polarizatio n and low and inflation is reaching a new economy high, people are becoming more not and more intolerant. People hold establishe different views regarding the savior convincing of the economy and ultimately souver of the country. Should the incumbent government keep running and give their best to stabilize the economy, or new government should be placed to take care of it? The both sides are getting extreme in their views regarding this question. With the inflation reaching its peaks, political palaxization is finding new peaks too. People are being violent in their actions to the opposing views and are ready to bit each other to prove them. selves. Price like is making the

political polarization go worse Price hike is also affecting the reach of people to access the basic necessities. These basic necessities have turned into expensive luxuries for the middle class. People are unable to afford even the basic commodities. Even the food got the severe hit of inflation Wheat prices are increased by 141% while rice pricess had reached Too many repetitions 102%. People are spending most of their earning on basic food sentences and ideas. items while all other necessities like buying clothes and sending kids Write concisely to school for good education are turning into luxuries. Not being able to get good education is also doing bad to development. With CPI hitting 38%, people are finding it difficult to live well m limited earning. Price hike is proving itself to be worst of all Price hice has triggered

the destruction of society in Pakistan Pakistan is A former middle income country and overage pakistani hardly makes ends meet. But, inflation is increasing the cost of living for Pakistan. Not only had matia started Too hoarding but also public officer 5 many claims are hirned to corruption. It has without evidence made the life of a common pakistant a living hell. People are also scared as exime rate is also increasing owing to inflaction hit living street comes are at their peak and people are being shot dead for not giving their belongings to looter Those who can not cope with the hunger of their loved ones are turning to envide, Humanity is elaughtered for the bag of mexpensive flour. caw makers are not doing well as they can not find modern apparatus owing to high cost of et. Blowly and gradually, society is breaking down because of the inflation

Moreover, Businesses are also being what down because of inflation. Price hike has coursed the increase in the prices of yourmaterial. This has made small businesses to shut down. The start-up beom in Pakistan is deescalated and had taken a nose alive. Similarly many medium enterprises are en ventilator. This price hike has not spared by businesses either. Many big businesses and industries had taken the brunt and had lowered their production for not being alle to purchase inexpensive raw material As described by the Orctober report of Pakistan Bareau & Statistics, textee industry has shrunk by 24.6% because of low imports of raw material and energy crisis. Similarly, many important drugs have alsappeared from market for the shortage of you maderial. This your materials shortage has made many dreamers to give up their dreams. Inflation

has impacted businesses and proved itself worst of all other worries. Technological backwardness is also apparent and is becoming more visible because of price hike. Inflation has made it difficult to bear the cost of living, along with educating (pear) children from good institutes. Brain drain is also reaching its peaks as more than 800,000 people had left the country because of recent economic turmoil coupled with security threats. All of this is causing Pakistan to be stagnant on the road to development. Pakistan manked 99th m World Innovative Index 2023 that is even 12 points worse than the rank of 2022. It is because of the inflation that made the price of developing new technologies unbearable along with intellegentia leaving the country. In the present exa , this technological backwardness will out the country from global chessboard and also make the country dependent

on technological grante undermining the security of the istate in the long run. This technological backwardness can be blamed on the inflation in a state where people are hardly keeping their body and soul together. The crisis triggered by price hike dre becoming evident day by day. Pakistan needs to curb the root cause price hike all soon as possible. The first step forward is stabilizing the rupee against dollar. It is possible by taking reforms serious so that IMF rede releases the 1.1 bn tranche. It will pull the investors back, and will stabilize the currency of Pakistan. Once the currency is stabilized, it will lower the fluctuation in the market products, and, through right reforms, sticking of prices can be reversed too. Corrency stabilization can be achieved by taking loans from friendly startes. Pakistan should

do whatever it takes to achieve the goal of stabilizing currency in positive way. Once stabilization is achieved, it will deescalate the price hike ultimately curtailing the cxisis of inflation. CUX (en Mong with stabelizing money Pakiston requires to take approach of permanent policies in economy. All political parties should agree upon a long term economic policy. It is waste of revenue when projects are mid-halted because of new projects adopted by new government. So, it is important for all political parties to agree upon some terms and condition & for Packistani Long term economy to prosper. Once permanent policies are in place, it will attract the investorie, As economy will get in better chape, it will de escalate price hike and reduce it. The crisis in place because of price hike would die down, thus, permanent policies can reduce the inflation

and curtain the crisis triggered by Industrial reforms and export oriented approach should be adopted to stabilize the economy and curb the price like. Though price hike and shattered economy has troubled Pakistan in many ways, they also have provided Pakistan an oppurtunity to undo the past mistakes and rewrite new Juture. Textiles and pharmaceuticache are the only hig industries of Ratistan that too are lagging behind India's industrial unit. Not much focus was given to industrial growth as "maxia Ray" prevented the growth of new industry Only new industrial units were actually assembling units dependent on imports of smaller parts. This does not translated into growth of small and medium enterprises either stagnating the mobistry where it already was. It is time to do industrial reforms that is

export related. Export oriented industrial growth will elabelize the economy and prosper the country. Not only & the aliseause of inflation be cured but ger capita meome would also increase. This way industrial reforms can curb the price hike. To put it in a nutshell, price hike - triggered by global forces along with do poor domestic policies - has proved itself stam to be worst of all wornes ! It how impacted the welfare of the people who are unable to cope with the disauter of inflation. Tearing the social fabric of society apart, it has given out an intolerant society With businesses shutting down and no technological development, Pakistan is sinking lower into many exists at once. It is high time to reform the country's economy to curtous the looming crisis of total breakdown Stabilising currency, placing permanent

policies in front & investors and reforming inclustrial sector to make products at home can help to lift off the curse off the society. Pakistan should stop serving the few elites and work towards the welfare of general public who is taking all the brunt of inflation. It right policies are not placed in the society to curb the inflation - the worst of all worries it would kill the society quite literally.
