Thesis Statement (1)

Argumentative Essay

Topic: Expanding Information Technology -
a blessing or a curse?

T.S: Increasing Information Technology
can be a curse or a blessing
depending upon its uses and management.

Use only
one term

The spread/growth of information technology
is a blessing because of endless benefits. By
reducing/controlling its negative uses people
can take advantage of IT. (40)

Topic: Classrooms decide the future
of the nation. [Expository]

Too long

T.S: (2) Classrooms devise and construct the future
of the nation either bright or dim depending upon
the nature of classrooms' environment. Negligence
in the developments of good classrooms can have
adverse effects on the future of the nation. ^{By}
order to build a classroom system which promises a bright
future, a firm commitment and integrated
efforts by national and international platforms
are urgently required. (~60)

Topic: Sometimes we do not see what we see. (Literary?) **Abstract**

T.S

Sometimes, it happens that we do not see what we see. There is a possibility that we may see one aspect of a certain phenomenon and ignore the other facet for certain reasons. We should observe the world critically, indiscriminately and comprehensively in order to understand it easily. (48) completely?

Outline: We are not known by who we are, but by what we say.

In Abstract the headings are in sequence 6, 6, 5 paragraphs, but I could not find any material from internet, so it is short.

Do not attempt the topic for which you have insufficient material
