

'Artificial Intelligence Has Overstepped Its Bounds'

Outline

I- Introduction: The growing reliance on artificial intelligence (AI) led to its rapid advancement to an extent that it has overstepped ~~its~~ ^{the} bounds. The horizon of AI expanded from something as basic as smartphone and as smart as military reconnaissance. The challenges posed by AI can be reduced through pragmatic measures.

II- AI has partially not overstepped its bounds:

- No prominent role in the realm of religion
- Bare minimum contribution of AI in legislation ~~making~~ and implementation
- No major significance when it comes to social bounding

III- AI has mostly overstepped its bounds:

- Switching of state institutions to AI softwares - increased reliance
- Usage of advanced algorithms to direct users attention on screen by advertisements
- Increased reliance on AI in health sector, from diagnosis, prognosis ~~to~~ operation
- AI assistance in military for intelligence, reconnaissance and surveillance
- AI as a solution to the contemporary ^{general} _{make} issues

- f. Invention of self-driving automobiles
- g. Assistance of AI in crime cell
- h. Field of arts being aided by AI Softwares
- i. AI has taken the grounds of education sector #.

IV - How challenges posed by AI could be reduced?

- a. Quick learning and adaptation of AI
- b. Global law regulation on AI and its usage
- c. Awareness by civil society against the negative usage of AI
- d. Promotion of habits which fosters creativity - survival against AI

V - Conclusion
