

Water crisis in Pakistan is a threat to the very existence of the state

## Outline

### 1- Introduction

**Thesis statement** - No doubt, water crisis is a potential threat to the very existence of Pakistan. Several factors are behind it which, as a result, lead to mass water scarcity, economic meltdown, food scarcity etc. However, robust measures can minimize the threat of water scarcity in Pakistan.

### 2- Water crisis in Pakistan: A threat to the existence of the state

### 3- Factors behind water crisis in Pakistan

- a) Population explosion is a root evil of water crisis in Pakistan
