

Artificial intelligence has overstepped its bounds.

1. Introduction

Thesis Statement: Artificial Intelligence has overstepped its bounds in some cases. But in reality, Artificial intelligence does many beneficial things within its boundary, such as it raises ~~increase~~ the level of education, and it advances the technology.

2. Analyzing the concept of AI

3. AI has not overstepped its bounds: (Thesis)

a) AI Provides better source for security

b) AI helps to uplift economy

c) Technological advancement ensures

better healthcare due to AI.

d) AI Gives opportunities to do thing in convenient way

e) AI ~~Rises~~ raises the level of education

4. AI has overstepped its bounds (Anti-thesis):

a) AI Damages security and privacy through hacking etc.

b) High cost of AI damages economy

c) Cost of healthcare increases due to AI tools

d) Man is totally dependent on AI. such as on robotics

e) lack of critical thinking ability due to AI tools such as ChatGPT.

5. AI has given more benefits within its boundary (Synthesis):

a) Security is damaged ~~is~~ mainly because of human

b) Use of A.I ensure production of goods which uplift economy.

c) A.I ensures the treatment of every disease.

d) Robotics prove a great tool of A.I to do things faster than men.

e) A.I ensures distance education for every student.

6. Conclusion
