Introduction

In the wise words of Erasmus, 'The main hope for a nation lies in the proper education of youth.' This is unarguably true that the role education of the youngsters ~~place~~ plays a decisive role in the future of a state. In order to promise a thriving tomorrow, the proper utilization and talent channelization seems of utmost importance. Youth is the most cherished measure of a state and has the ability to positively contribute to the welfare of the state. Not only is this a superpower against enemies but can also improve the social, economic and political conditions of a country.

However, in Pakistan, the scenario of educated youth is rather pitiful.

Due to lack of employment of the educated youngsters, wastage of potential and increasing brain drain can be observed in Pakistan. Pakistan is unable to tap the valuable resource that is the learned individuals ~~who~~ who are so eager to build a better future for themselves as well their country. Most of the problems that Pakistan is facing today are due to lack of young minds in decision and policy making body. In order to yield maximum benefits, creation of job opportunities to gap the economic vacuum^{is} of utmost importance. Providing a chance to youth would not only mean improved economy, but also political and social status of Pakistan. Therefore, among the many challenges Pakistan is currently encountering, the ignorance towards the usefulness of youth needs to be addressed.

(Paragraph - 4a)

One of the grievances among educated people is the lack of unemployment.

It is not hidden from anyone that youth suffers from employment crisis to much extent in Pakistan. It is

also noted that among the young people who are unemployed the ratio of educated ones is higher. It is estimated

that 67% of unemployed in Pakistan are educated whereas the unemployment

of uneducated people is 33%. (Dr. Ishrat Hussain, Education vs. Employment, June 2000)

This reflects the loss Pakistan is facing in the form of wasted bright minds.
