

Some people have dreams, some don't.  
Count me in later one. I was  
a person with no specific goals.  
I always wanted to do  
something for people, and  
leave a good legacy  
behind. One can say that,  
I was influenced by my  
upbringing and my surrounding  
environment or struggle in  
childhood. I can't say much about  
it, let's leave the past  
behind, as every one <sup>once had</sup> face it.  
Anyhow, when I was in  
5th semester of my graduation,  
one of my fellow <sup>use to tell</sup> always told  
the teacher about that, she wants  
to become a Assistant Commissioner.  
She <sup>was</sup> repeated this every single day.  
At that time, ~~son~~ to  
connecting with any social or  
political organization was may  
be one of my dream. But  
power might be right fit in  
Pakistani political scenario.  
Soon I realize what I want,  
can be achieved to be  
in the a part of civil-  
service. That day I decided  
that I want to do

CSS, my teachers encouraged me to go for it. I was tensed that we don't have money for academy or any coaching bcz I know not much about services. When I completed my graduation, I gradually asked my mom that I want to join National-officer academy in Islamabad. What else but last piece of land my family owns my mom sell it and I went to Islamabad for coaching in NOA. The course was consisted upon 4.5 month. But it was a very good experience with academy with the guidance of teacher like Sir Ishaqullah (FSP) and Hassan Ali Gondal Sir Masbah Illahi and in evaluation mam Sehar-Hayat. Due to some hostel issue I had to return home, so I only took three months of coaching in NOA, and shifted to online batch.

Due to result declaration date not issued  
I was unable to apply for  
CSS 2024. My teacher in  
college used to tell me that  
it will take 2 years ~~at~~  
my level of learning for  
CSS. I had watched so many  
videos on internet that people  
sharing their stories with 5 month  
or 8 month of preparation, but  
what I go through with ~~class~~  
syllabus and coaching, I realized  
I will take 1.5 to 2 years  
for CSS preparation. After  
coming back to my home it  
took me almost a month  
for deciding my strategy,  
my planning for CSS.  
Finally I have made a  
2 year plan from 17 Nov 23 to  
Feb 2026. I know that my grammar  
basic are not so good and  
I need to prepare notes  
and need a lot of practicing  
skills specially writing practice  
I am going to disappear  
from world for 2 year.  
my strategy daily routine  
consisted on 15 hours study.  
wish me luck. finally I have  
a goal that I am working for.
