

We are living on this planet as if we have another one to go to.

Outline

1- Introduction

Thesis statement: Unfortunately, we are living on this planet as if we have provided another one to live on. No doubt, living style of a man such as, natural resources destruction, lack of hygiene, nuclear race etc is a proven fact of it. Growing tilt of threst to the planet shows as there exist another one. But, some steps be taken to save the planet as we have only one to live on.

2- How we are living on this planet: An overview

3- Living style of us on the livable planet

- a) Continual shifting of a clean living place into dirty one
- b) Posing threat to natural environmental stewardship
- c) Devastating necessary human resources on the planet
- d) Creating a nuclear planet for its devastated end instead of its protection
- e) Dividing the planet into unequal pdes: Unsustainable progress

4- Why we are living on this planet as if we have another one to go to.

- a) A man has become a brutal rather than a

social animal

- b) Growing globalization has already paved a way for the sustainability of planet
- c) Leading style of a man towards unending global dilemmas is complicated
- d) Changing global order from unipolar, bipolar, multipolar and so on
- e) Human conflict and disparity has weakened the essence of the planet
- f) Advancement of technology, but lack of right consciousness among humans

5- Methods to save the livable planet as we have only one to live on.

- a) Preserving natural environmental stewardship
