4. Beri-beri	Vitamin B <sub>1</sub>
5. Anaemia	Vitamin E

## Q NO 2 (c)

Why are scientists worried about the increase of CO<sub>2</sub> in Atmosphere?

Scientists are worried about the increase of CO<sub>2</sub> in the Atmosphere because it will have adverse effects on human, animals or other living organisms on the planet Earth.

CO<sub>2</sub> is among the greenhouse gases which contribute to greenhouse effect. Moreover it contributes more than 61% in the Atmosphere.

The increase level of concentration in Atmosphere will also contribute to the global warming.
