

People have become overly dependent on technology

Outline

1) Introduction:

Thesis statement: The advancement in the spheres of Science and Technology has rendered the use of technology ubiquitous. This pervasive use has led to people becoming overly dependent on technology. This over ~~reliance~~ can yield dire repercussions not only in an individual context but also at a broader societal context and, hence, policies are needed to nip this issue in the bud.

2) What is meant by over-dependency on technology?
