

Artificial Intelligence: Boom or Bane?

Outline

1- Introduction

Thesis statement: - Artificial intelligence has served mankind ^{Like any new technology, AI also has some boons and banes} that has several booms and banes. In fact, AI is majorly responsible for its booms which include, educational facilitation, mass awareness, judicial reforms etc. However, some critiques believe in its bane that does not meet with responsible logic. Hence, AI has really become for mankind. (Words 50)

2- An overview of generation of Artificial Intelligence

3- Artificial intelligence is really a boom for mankind (Thesis)

- a) Artificial Intelligence has facilitated students in learning quality of education
- b) Chat-GPT is a source of interested mass awareness among public
- c) AI has reformed judicial system in developing countries
- d) Usage of robots has increased industrial development
- e) AI has promoted advanced technology in the world

4- Artificial intelligence is a bane for mankind (Anti thesis)

- a) AI has threatened students' creative learning due to over-dependency on prepared material
- b) Chat GPT is also a root of providing plausible journalism
- c) AI-based decision is beyond the realities of life happenings
- d) Dependency on robots has replaced manual work as a huge threat to mankind
- e) Advancement of technology has resulted fear of hybrid warfare.

5- Artificial intelligence is a boon rather than a bane for mankind (Synthesis)

- a) Not at all, but AI has helped students in accessing technical learning
- b) Chat GPT, not itself, but a leading way of journalists causes plausible journalism
- c) AI, no doubt, has helped in fast and sound legal performances
- d) AI led robots has assisted people in manual and other works
- e) AI has ensured strong cyber space and privacy system in order to promote peaceful technology.

6- Conclusion
