Q NO 2 (C)

Why are scientists worried about the increase of CO₂ in Atmosphere?

Scientists are worried about the increase of CO₂ in the Atmosphere because it will have adverse effects on human, animals or other living organisms on the planet Earth.

CO₂ is among the greenhouse gases which contribute to global warming. Moreover it contributes more than 61% in the Atmosphere.

The increase level of concentration in Atmosphere will also contribute to the global warming.

short and incomplete answer. discuss it in detail by giving subheadings and be on 2-3 pages.
