It has already been checked. Please provide marks on the basis of content. I'll fix the issue with the headings. TIA.

	icial Intelligence: Its framise & Perils Date: 24/Nov/23
	OUTLINE
1) In	ntroduction:
	Theris: Artyrical Intelligence holds immense promise to
to	ansjoem the lives of manking towards a better putine. However, alon
	the numerous benegits, it poses a significant threat to the security and
и	sell-being of people, shith require multipacited sprouch to minimise I
p	Sential peuts and maximise the benefits Multifaceted
2) Th	e Promises and Perils of AI in Contempo kary world
3) /	Partificial Intelligence and Its Promises (6)
a	Revolutionising healthcom by medical breakthroughs.
- b	Empowering education by emorning better leaving.
c)	Improving urban living in Smust Cities.
d)	
e)	Introducing speed and accuracy in tasks.
)	he Risks and Dangers Associated with Artificial Intelligence (6)
a)	Compromised security due to Cyber-cume!
6)	, Julian Committee of the Committee of t
c)	Dangerous implications of AI in wargare.
d)	Environmental degradation by Almaintenance.
e)	Identity theft wring Artificial intelligence.
)	factors Contributing to the Perils of AI (4)
a	Rapid advancement of AI and lack of regulations.

I don't usually give Marks

TOPIC: Astipicial Intelligence: ITS PROMISE & PERILS

-	Machine Intelligence is the last invention that humanity will ever
	need to make"- Nick Bostrom. This quote elucidates the importance
	and grandeur of the Artificial Intelligence in fransporming
	todays world to an extent that no other invention might ever
	Come close to it, let alone outperform & por good. In the
	contemporary selling AI has not only helped in the domestic reffices
	but also the industrial applications. From medical breakthroughs
The second	to educational facilities, AI has parlitated almost every pield.
2000	It has resulted in job creation that boosts the economy, as well
	as the public trust in it that it would do so. Moreover, it protecting
	speed but also accuracy in performing the tasks. The modern
	use of AI in smartcilies would ensure improvement in urban
1	living standards. These tremendous and outstanding benefits
	also bring along several missoftunes and evils that thwart
	the societal progress and enfranger social wellbeing. These
	perils include Eypercrimes and other dangerous implications
	of AI in wavefare. The adoption of AI in industrial and profesional
	selling would result in replacement of humans by robots that
	would widen the economic imbalance. Not only this, the maint-
	enance of large AI softwares require elements that reget in enviro-
	nmental degradation to purther add to the climate crisis. Additionally,
	identily thept remains one of the biggest drawback of AI in modern
	world. These harards of AI are worsened by gertain restrictions and
	Comitations that artificial InTelligence has, such as compredictabilly,
	algorithm bias, and lack of autountability pollowed by capid advancement.
	Page Victory

This is the season why shaping a responsible guture is equally significant and crucial by inhodusing relevant regulations and bylaws, implementing sewing pleasures, and speading awareness about the threats of wing Artificial Frielligence furposition. Precisely, the emergence of AI holds immense promise to transfam the twee of mentional lowereds a better pipeure. However, along with orumerous benefit, it poors a significant fureat to the sewindy and wellbeing of people, which require militipeuted approach to minimise the premises and perits and maximise the benefits. Do not add the hear the promises and perits of RI in contemposition worth ave form the interplay of the perits and formes of REstitionally yet neared. There is a fineline between the wise of technology and the right use of technology, which soffen blunded by inexpossibility of the mankind—with the case and accordinately provided by AI, there are certain boundaries that should not be crossed. In the bords of Clon Missk, the pounder of Speece and Testa, "AI is permore dangerous than makes." This unduscover the challenge, and issues that the incorposible use of Artificial Intelligence might being which would be pararouse than nuclear weapons which as the deadliest instruction of humano beings! They gove, despite the counters bluming expected to manhand in from of AI, one should always be apportunished by the harmes of this invention, the responsibility of which palls on the shoulders of this invention, the responsibility of which palls on the shoulders of this invention, the responsibility of which palls on the shoulders of this invention, the responsibility of which palls on the shoulders of this invention, the responsibility of which palls on the shoulders and invention of this recently seems would note as well as the creation		
significant and crucial by inhodusing relevant regulations and bylaws, implementing security greatures, and speading awareness about the threats of wing Arliquial melligence duspmontoly. 3- Artificial Intelligence and Its Promises

Arligicial Intelligence opper countless blessings to the mountaind in jorn op:

- Revolutionising Healtheaps has been one of the figgest contribution of all outificial insettingence in serving the humanity. The milentone achievement of technology in the pieth of medicine is the medical breakthoughs. These breakthoughs ensure the maximum health possible of the human beings by eliminating the disease or the possibility of the obsease prior to the oliagnosis by using complex algorithms. One such example of this is Sybil'. Sybil is an AI cobot that is invented by the necessibles of the Massachusetis Institute of Technology (MIT), that uses a single low-dose computed tomography (LNCI), to accountedly predict the pedice chances of an individual in getting lung cancer. This will decrease the risk of the patients in getting sich by lung cancer, by taking preventing measures. This is enough to prove the effectiveness of Artiquial Insettificance in
 - Empowering Education by ensuring past and bett learning has been another continuously AI in the pair of mankind. Artificial Intelligence opposes valuable insight in the gield of education to be seemore redundant information and introduce precisioners and accuracy of the data. This results in students wasting less time on putile, in accurate and irrelevant data, and thus increases their productivity and learning for instance, the induction of large

	Date:
	Canquage Models (LLMs) such as Chat GPT, Baid, and others,
	have changed the way traditional varys of learning among
	students by enning speedy, comprehensive, and correct
,	information on their gangelips at every hour of the day.
	This ensures productive and eggicient output you lie students
	and the Teachers. Hence, it adds to the part that the
	advent of AI and its role in evolving the educational
	prailices is immense.
	c) Improving Urban living is another modern application of
	the artificial ribelligence in revolutionising lie gulive of
	manhered by providing ulmost congogle and ligestife. The
4	use of AI around the globe in Sphart Cities is at early
	levels at the moment. However, by the spady growth of
wa.	AI in a little time, the era is not for when people would
	be witnering lie prime of this convention. To exemplify,
4 1	AI has been developed to be seed in Trayou control dysiems,
	Energy management grangiveles, waste-disposal progeets, and
	envisonmental surainability analytics among others.
	It will competely all the current ineggicient and harmyal
	practices towards a prosperous and healthy mechanism for
	cerban living, which puts another badge to the shoulder of
	Artificial Intelligence.
	d) Creating more jobs and improving econory are other major
	adrievements of the Artificial Intelligence. The induction
	of AI in the professional world opens numerous doors of

opportunities and success por the people, which makes them embrace this invention with open arms. According to the survey dada collected by Access Now, a distal rights advocary organisation, 75% of the people in China, 73% in India, and 72%. in Mexico, who are employees are positive about the impact of Artificial Intelligence on their careers with respect to opportunity creation and introduction of distornation in their jobs. The data collected had 15000 porticipants who showed optimism about AI in the job market and the propersional setting. The more the creation of Jobs, the greater would be impact of it on the global economy. As per the Pricebiater house Conver PPac), a leading properional service prim, AI will add or whopping \$15.7 trillion to the world GDP by 2030 This advocates for the part eval AI will not only ininoduce jobs in the onarted but will also enhance the global economy to a great extent.

Introducing speed and Accuracy intalls is another geather to
the course of Heliquical hitelligence. This instructor that the
progress of AI is not necessarily restricted to introduce aspects
but also concrete aspects. It weighs apon the strategic and intuitive
decision making abstitutes of AI, that has in a very little timegrame,
which is of remarkable benefit to markind in current and
juture settings. For instance, the Deepplind Challenge of 2016,
specifically Alpha Go versus Lee Sedol, one of the world's top Go player.
Go is a complex game that requires rapid evaluation of pokertial moves.
In this matter historic math, Alpha Go, the AI votol, won the game
by analysing complex hoves very quickly with great according this

For example, Tay was an AI robot of Microsopt that when interacted with the content		

4	
-	that the unpredictability of AI robots add to the dangers of AI.
•	
4	c) lack of Accountability due to autonomous decision making is
-	a continuor to lue rishs of Arlipicial Inselligence. This is due
	to lie decision-making power given To AI by the inventors
C	which evades them grom the responsibility of possible accidents
4	and puts the blame on the human made machines. This
-	leads to the dillema of surhould and should be held
•	responsible you the malgunitioning of AI. In 2016, Tesla Model-S,
	an autonomous driving vehicle, crashed into the curb, when
-	pul on outopilo mode and killed the driver in Floriday USA.
8	The accident was blamed on the distraction of the driver and
-	the company was acquired and leemed innocut by low.
•	Theregore, this lade of autumatibility when it comes to AI makes
-	it prone to add to the paids of the putificial Intelligence.
	The state of the s
-	a Algorithm Bias in AI is yes another conhibutor that adds to
3	the hazards of Antiquial Intelligence. The algorithms when
e	coded into the AI sophwares, sometimes, are not eppicient on
6	equitable basis por the population alike this results in biases
•	leading to the marginalisation by AT and its equal benefits to the
9	mankind based on certain pactors such as race, age, gender, et
9	cetera. According to Massaelussels Institute of le unitogy tregearchy
9	At movered pacial-recognition softwares showed errors in recognition
9	of 342/ black women as compared to only 0.8% while women. Processer,
•	and in in blat porms using AI should be as against old workers who appear
8	por jobs by resulting in 50% less cell back hates, (MIT review, 2018). This

· · · · · · · · · · · · · · · · · · ·	to lie algorithmie bias and makes it one of the contributors
	of the Arliqueial Invigence perits and harands.
	6- Shaping a Responsible AI Fulure: The Way forward
	The potential peads of the Adaptive Intelligence and the
a -	partons contributing to these peril demand you mulligareted and
	strategie resolutions such es:
10 mm	a) Inicocuting comprehensive regulations on rapid advancement y AI
# F	is the most required measure of the lime to kimit the negative
	consequences of AI. These rules and regulations will not only ensure
	that only the best and most amurate technologies surince the
	competition to give what's best for hamanily rather than jumping
	on the bandwagon to just bring more advancement regardless
	of the consequences. This will be a slep towards the greateryoud
	of the inhabitors of this planed. One such step if this regard is
	Betchley Declaration's igned by 28 countries and the European Union
	on 1st November, 2023, to combar the wheheld development of AI.
	There types of imitialises to invoduce comprehensive regulations on
	limiting the appradations of Antificial Intelligence would ensure
	peacepul fomorios.
•	b) Implementing security measures to prevent AI related Lybercume cis
	also a demand of the evolving situation with respect to AI and its
	inveasing risks. These security meaner will help in eliminating the
	underried outcomes of viresponsible and vile use of this technology.

3	
	It would help ensure a sage environment if the context of the
	advaniement of technology. For instance, HIPAA regulation is
-	used by hospitals to save the patients' data against breaches while
	peoriding security and pluous to the stakeholders. Induction of
	Such security measures in the AI selling will bring about the change
R	needed to miligate the sagety concerns of this technology.
	sugary concessor off that factoring
3	c) Spreading awareness about the threats of Al is also required to
?	adden the adverse eppeils of this techty informing the population
3	of the consequences of irresponsibility in the use of AI technology.
9	
8	It would make them be more prudent in their alilization and dependence on this tech: One out organile is a lower Date Rivery Day
3	dependence of this tech. One such example is of Annual Data Privacy Day
R	It promotes beat mentions and to be Within and prince of prince of a series
	It promotes best practices of data protection and privacy against potential
8	the threats on OT
•	the threats of AI of promoting it to the shape a better pulie for
•	llie galobal populace.
9	1 Conclusion
<u> </u>	To conclude, it can be elucidated that with numerous
•	promises, AI also brings several perils which regime responsible
•	use of such technology. While providing the privilyes of better heathcare
,	and education, improved lipestyle, enhanced economy, and ease in work,
	AI also leads to security concerns, ememployment risks, and environmental
	degradation due to lack of regulations, auduntability, redictability, and impar-
6	tiality. Therefore, it should be used with prudence along with measures to combat
	rapid advaniement, systemene, and unavalenen which will help ensure better
