6. Conclusion:

Online learning is not only convenient but often more effective than traditional classroom instruction.

Modern schooling is far more varied than that of the 19 century. The evolution of pedagogy and other revolutionary discoveries have led to the implementation of more transparent educational system.

Online learning gives students the freedom to attend classes at their comfortable place. Not only the freedom of chosen place, also attend number of conferences and workshops from different universities in a day. Due to traditional learning students was unable to attend missed classes but now due to online

learning missed classes available in the form of recordings. Not only students can attend

missed classes and also in touch with teachers 24/7. Teachers also play an important role to ease the education methods, by sending videos clips, files etc for the better understanding of the topic. For this purpose teachers ~~itself~~ work onself to learn new technology for using different apps. Students parents also engaged in this process. Online learning helps the teachers to attend large number of students in one class, in traditional class room it was not possible. As students teachers enjoying these technologies, it is also the way of earning by making different educational channels and it also increase the literacy rate because now education is not limited in some cities, it available all where, where

Internet facility present.

Online learning is the more effective form of learning as compared to traditional one, because it provides the choice space to students and also students get diverse form of knowledge through different websites. For the understanding of difficult topics, student get help from youtubes, google etc. online education also help those middle class and poor students who are not afford hostles expenses, because internet is available in every home now.

Online learning also help students to earn money through online business and through different youtube channels.

As compared to traditional learning online learning is more easy and effective for students, teachers and parents.

Online education is very beneficial to all students, because it gives the choice to sit in comfortable place and attend the classes. When the students get education in comfortable environment they absorb alot, they learn alot. According to Hamza Hassan, Dawn Sep 10th, 2012 those students who's learned in stressfree environment have more opportunities to develop then those students who's attend classes in discomfort environment.

Absorption of knowledge is directly proportional to the more comfortable environment where student sit to attend classes.

Moreover, some students are not able to attend some sorts of workshop due to far away

from the home but due to online learning student easily enrolled in different workshop within country as well as out of the country.

According to Khandelwal's Dawn article 14 June, 2020,

Nearly six million college students are enrolled in online courses that are expanding by nearly 20% annually. Online learning helps all the needy students who want to attend classes workshops from different platform but not did because of some difficulties but now they all can get easily.

Similarly, Online learning give opportunity to all students to use different tools, in traditional learning students were bound to read and write only but in online education

Students are not limited to written texts only they can record audio, access to video clips, photography etc. - Dawn.

Online learning is more beneficial because it introduces new features of learning which are very helpful for students.

Moreover, online learning also helps for those all students who want to learn diverse type of courses which are not offered by his own university. According to Dr. Saqib Iqbal, Dawn, 7 May, 2017

Students of today can learn from different courses offered by diverse institutions instead of committing to a single university and being by its course offering. Thus online learning helps student

for ~~many~~ developing many skills from different courses.

Moreover, Online learning also ~~be~~ beneficial for absent students. Those students who absent their classes for any reason, online system help these students, because online system provided lectures recorded opportunity free of cost. According to (Dawn, ssep 2020) live lectures as well as recording make it possible to open up teachings restricted to enclosed space in a classroom, to a much larger space. Now missed lecture is not a big ~~standard~~ problem for students, after sometime they can easily attend it. Similarly, Online education contribute in increasing literacy rate in the

Country. Every nation, country where education is easy for all where everyone is educated. Specially, online education is beneficial for girls, those girls who live in tribal areas or where education facilities are not good as in developed areas. These girls could easily get education from home via online system. Online learning not only eases the way to get education but also increase the literacy rate. Online learning has much more potential than a traditional one because traditional learning is limited to some extent but online learning introduce much more features that are more advance and

6
help the students to compete
in advance world.

Moreover, through online
education students and
teacher get familiar with
different apps and
new technology. According
to Dawn, 9 May 2020,
online education has
potential to change learning
in a bid to ensure
learning is not compromised
around the closure, they
are experimenting with
various e-learning platforms
such as Zoom, Google
Classroom, Hangout and
whatsapp messages. These
apps play important
role in education

because they all help
in understanding topic
and through these
are easily can be managed.
Similarly, online education

education helps the teachers to manage large number of students in single class. In traditional learning teacher face difficulty to handle large number of student in single class. According to Faheem Mustapa, Dawn, online in classroom maximum 40 students can be learn from one teacher but in online learning more than 100 students learn easily from one teacher. Online learning helps the teacher to manage the students and save maximum time.

Similarly, students can connect with teacher whole day. However in traditional learning teachers

available only in school timings but through online learning students can contact 24/7 to teachers for any query.

According to Sarah Tanveer a Beaconhouse School

System (BSS) reported that in through online learning students can contact easily to teachers 24/7 without any hesitation.

Online learning create is beneficial for students in every aspects.

Moreover, in online learning, ~~educators~~ teachers use different methods to understand the topic.

However in traditional learning teachers were

limited to books and boards but in online learning

teachers use different methods. According to

Sana Mustafa Malkoni, principal

of the formation school system, Dawn reported that teachers used different apps for understanding the topics. Teachers send video clips related to topics, audio recording etc. Through these clips students easily understand the topic. Online learning help the students teachers and parents in very large spectrum.

Moreover, online learning create a number of jobs opportunities. Many students during education or after degree create different types of channels like youtube channels etc.

According to Dawn, people easily 40,000 to 50,000 PKR from youtuber channels. People also earn money from online business. Online

learning not only help in education it also help in ~~se~~ learning.

Moreover, Online learning is more compatible than traditional learning because online learning has so minimum fees as compared to traditional learning's expenses. In Traditional learning not only tuition fee is high but also not be afforded hostel, buses rent etc. But in online learning student only invest only in tuition fee nothing else there. Online learning is more efficient than a traditional learning.

In a nutshell Online learning has emerged as a more beneficial and efficient alternative to traditional learning methods. It offers flexibility in

Scheduling, allowing learners to balance their studies with other commitments, and provides access to a wide range of resources and expert instructors from around the world. Additionally, online learning promotes self-discipline, digital literacy, and the development of valuable skills for the modern workforce.

While traditional learning has its merits, the advantages of online education in terms of accessibility, convenience, and adaptability make it a compelling choice for the 21st Century learners.
