## 6. Conclusion.

### Essay:

Abdur-Rehman; father of seven children. Came from Dubia, looking for his home and family members. Upon reaching swat, he could not recognise his own home town. As floods had destroyed everything. He burst into tears, shouting for his family. As he approached other flood victims, he came to know that his wife and two children are dead because of the floods; as it swept his mud house. Well in Pakistan, many people like Abdur-Rehman, were affected due to floods. Floods had

Changed the whole landscape in many regions of Pakistan. People's lives, properties had been destroyed. The agricultural sector <sup>got</sup> <sup>was</sup> greatly affected, which ultimately causes socio-economic problems for Pakistan. Mass migration, unemployment and inflation occurs due to floods. <sup>And</sup> there was lack of preemptive measures or efforts by the government. Furthermore people were also unaware about the severity of the natural threat. Well, floods are the biggest natural threat to social and economic situation of Pakistan, which needs proper attention to combat or decrease the impacts.
