

Homework 2:

Nuclear challenge to world peace during 21st Century, (with in-text-citation)

- Write an academic paragraph with reference on this topic.
- Word limit should be 100-120 words.

"Nuclear challenge to world peace during 21st Century"

Nuclear weapons being the most hazardous equipment is challenging the peace on which enormous organization is working upon. World is facing many other challenges like Global warming and climate change which are natural and meanwhile this Nuclear weapons which are man made. Even though it is challenge to whole world but still many countries are working on spread of nuclear weapons. Whereas peace organizations are encouraging the non poligenation of nuclear weapons. "A nuclear war cannot be won and should never be fought. I urge all members to uphold their commitments towards nuclear weapons and non-poligenation and continue to work together to overcome mistrust." (UN, 2023)

It is obvious that nuclear weapons are structured to harm humans and destroy peace, so all human beings should work on its non-poligenation, to sustain peaceful environment.
