There are many reasons, that ~~country~~ like Pakistan large number of population of Pakistan is unemployed. Increase in population, slow growth of economic sector and fall of cottage industry are some of those reasons; furthermore these

are the major factors behind unemployment. Apart from this, the situation is so serious that literate people are ready to do the jobs of sweepers and government is not doing its job seriously. Aside from these, a large number of population is linked with agriculture and this occupation only provides employment during the planting and harvesting of crops. Beside from it, Increase in population is also a main factor and government is unable to provide them jobs.
