(Body Paragraph)

## Exploited poor owing to weakened policies

Poor people in Pakistan have been exploited for many decades. The key reason is weakened policies which continuously suppress the poor. When any party in Pakistan comes into power, they take those decisions for strengthening economic indicators, which favour the elite class and business class, not poor. Therefore, poverty rate in Pakistan reached 39.6 percent as per world bank. Further, owing to mismanagement and useless policies, people are confronting skyrocketed inflation and unemployment rate. They have more been trampled and even they do not fulfil their fundamental needs. Thus, the poor people of Pakistan has been ill-treated because of useless policies.
