

What things can help you most in preparing for CSS?

CSS in fact, is a test of stamina which demands majestic effort and sonorous guidance. The study of 15-16 hours in a day without bona fide knowledge of what to read and how to read will be mere a brown study. So, for CSS preparation the first and most significant thing is right guidance in a right direction. Other than this, the maintenance of discipline, persistency, and motivation are indispensable parts of our preparation. Furthermore, to have an access to pertinent and FPSC recommended books also hold grand importance.

The writing practice on regular basis and evaluation from a judicious mentor can furnish our skills more. In a nutshell, a terse guidance, self-discipline and persistency, pertinent books, writing
