

Unlearnt lessons

"History of Pakistan is repeated itself as in Farce & Tragedy"

History is repeated itself of Pakistan, we have not learnt any lesson from own history. we are facing these issues from independence of Pakistan, still we are standing there where we started our journey. we are facing issues of Leadership, political issues, military intervention in country, Government duties and handle according to own choice. Unstable economy of country and depend upon Foreign aids and Loan which are temporary solution.

First unlearnt lesson is antagonist politics where everyone is trying to build own empire with strict conditions and without transparency. Every govt. look strict actions against opposition parties to tackle Government for long time. There are no transparency in Government.

Second unlearned lesson, intervention of Army in internal and external affairs of country as Zia-ul-Haq, Musharraf, Ayub as dire consequences on Pakistan Economy & other affairs. we gave a lot of GDP economy to Army to Defence system which is do not helpful useful for country.

Third unlearned lesson is fragile economy of country which is not stable since 1947 independence. we depends upon foreign aids, loans and IMF which are temporary solution of economy issues. Therefore, we should have to take actions against economy for solution for long time. which will be helpful for long term solution of economy.

Fourth unlearned lesson is religious extremism. As we saw a terrible incident Tehsil Jaranwala of District Faisalabad. Zia-ul-Haq stricts actions against religious is dire consequence on Pakistan issues, economy & peace.

Fifth unlearned lesson is Human capital. Pakistan is facing issues of inflation, unemployment, lack of proper education, infrastructure and due climate issues as flood etc. Pakistan's 20 million child are out of school. Inflation in Pakistan is increasing day-by-day. There is no justice for common man. Pakistan is on ~~140~~ 129 from 140 country in justice system ranking. And inflation increase in this year 45 percent which leads to unemployment.

In nutshell, we should learn lessons from our history and do the reforms according to requirements & conditions in the field of stable economy, politics, Army & religious activities & propaganda. Then, we will be on the way on progress. Solutions of all the problems are handle to these main issues.
