

Idleness: A Blessing in Disguise

Misplaced efforts of the hardworking people can result in wrongdoings. The devil also remains occupied and dislikes laziness. The disorder in this world is not due to the idleness. Instead, the world is energetic and this energy is not correctly utilized. Moreover, there is a deficiency of calmness and kindness. There is still emphasis on working hard and wasting no time. However, historical and present day examples show that taking time off to relax can be beneficial. In the past, if the delegates of Paris Peace Conference enjoyed some time off they would have left the world in a better state. Likewise, at present if the leaders focus on relaxing they would benefit from it. Moreover, the people in religious conferences, who focus on trivial matters rather than significant issues, can gain from resting and recovering their mental health.
