

# Children must be taught how to think not what to think

## 1. Introduction

Thesis statement It is necessary to taught students how to think not what to think. Because, in today's world, cognitive thinking is essential for children's development. So, some measures must be taken to teach students the ability of critical thinking.

## 2. Analyzing the concept of "How to think" and "What to think"

## 3. Why it is import to taught students "How to think"

a) To tackle the problems of today's world.

b) To stand with the global world in every sector.

c) To enhance the ability of cognitive and critical thinking

d) To upgrade the level of intelligence of individuals.

e) To upgrade the level of education

4. If the children ~~have~~ only know 'What to think' not 'how to think', it results in:

- a) Backwardness in different fields (e.g. economy, business)
- b) low level ~~of~~ understanding the problems of modern world.
- c) lack of critical and technical thinkers
- d) Backwardness in technology development.
- e) students' interest in education decrease gradually.

5. Steps which help to teach students the ability of 'how to think':

- a) Training of staff as well as individuals of society.
- b) Revision of syllabus.
- c) Conduct workshops for children.
- d) Hiring of technical teaching staff in educational institutions.
- e) Ensure availability of resources by the government.
- f) Install system of regulation to ensure proper working.

6- Conclusion
