# Essay: Artificial Intelligence has overstepped its bounds

## Outline

### 1. Introduction

Thesis statement: Exploring instances where Artificial Intelligence may have overstepped ethical or practical boundaries.

merge

It is your stance of understanding of topic written in

### 2. Brief overview of Artificial Intelligence

Form of complete sentence Not Heading

### 3. As Artificial Intelligence overstepped its bounds? Yes

### 4. Unintended consequences of Artificial Intelligence

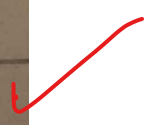

use to keywords in main heading

4.1: Artificial Intelligence system making biased or harmful decision

Case study: Incident involving Boeing 737 MAX aircraft

4.2: Accountability challenges in Artificial Intelligence development and deployment

Case study: Uber's autonomous vehicle fatality

4.3: Artificial intelligence has infringing on privacy rights

Case Study: Cambridge analytical and Facebook

~~4.4: Manipulation and Bias cases where Artificial~~ SP

Intelligence algorithm amplify societal biases

~~Case Study: Propublica's COMPAS Algorithm~~

4.5: ~~Automation displacement industries where Artificial~~ SP  
Intelligence driven automation has led to job loss displacement

~~Case Study: Retail customer service automation~~

4.6: Spillover Artificial intelligence can result in huge disaster for the world → classify

5 Benefits of responsible Artificial Intelligence

5.1: Artificial intelligence performs

write only arguments in outline

discuss before

difficult tasks to secure human lives

Case study: Bombing defusing robot wolvering 6x6 by US military ✓

5.2: Artificial Intelligence assures good governance by improving service dealing

Case study: ~~India's adjudicating bail hearing system~~ ✓

ensures

delivery?

or public dealing?

5.3: Artificial Intelligence improve cyber security to protect mankind

Case study: Security authentication in banks, schools and in traffic signals ✓

5.4: Artificial Intelligence helps in the reduction of crime rate in the society

Case Study: Women safety app and crime detection app in Pakistan ✓

boosts

5.5: Artificial Intelligence booms economy for humans to maintain better living standard

Case study: Artificial Intelligence gave 70% boost to international economy.

- Gartner report revealed 2021

5.6: Artificial Intelligence predicts the activities of climate change to avoid risk factors of global warming

6. Pragmatic recommendations to minimize the risky factors of Artificial Intelligence.

6.1: Human centric development should be prioritized

6.2: Ensure transparency and accountability in the Artificial Intelligence sector

6.3: Protection of users data to build trust in Artificial

## Intelligence

6.4: Track and mitigate biasness in Artificial Intelligence systems

6.5: Ensuring safe Artificial Intelligence systems which are not a threat to society

6.6: Create systems that are efficient and compatible with regulatory bodies

## 7. Conclusion

Outline must not exceed 3 pages

Add a couple more subheadings under heading 4 as it is the main topic.
