

Mankind faces the challenges of using AI responsibly

## Outline

### 1- Introduction

**Thesis statement:-** Mankind faces the challenges of using AI responsibly. Using AI responsibly leads to several challenges such as, plausible journalism, autonomous weapons, cyber operations etc.

Do not elaborate in the thesis statement  
Resultantly its implications including, misinformation, proxy wars, cybersecurity impeachment etc are growing. Therefore some steps be adopted to curtail challenges of AI.

### 2- A bird's eyeriew of generation of AI

### 3- Mankind faces the challenges of using AI responsibly

- a) AI generates plausible information in journalism
- b) Use of AI in creating autonomous weapons leads to hybrid warfare
- c) AI has deep roots in cyber operations
- d) Extra-ordinary techniques in decision-making by AI is growing
- e) Indulgence in AI has permeated in every phase of life

- f) Abuse of AI has created ~~political instability~~ within and without the ~~region~~. *That's AI abuse*
- g) Threats of surveillance and reconnaissance ~~are~~ growing in the world of AI ~~X~~

#### 4- Implications of challenges of AI on humans

- a) Plausible journalism has misguided public
- b) Proxies warfares are growing regionally and globally
- c) Risk of cybersecurity impeachment is at peak
- d) AI poses threat to human's creativity
- e) Use of AI has replaced manual work
- f) Human peace is at stake

#### 5- Suggestive measures to curtail challenges of AI

- a) Ensuring strong cybersecurity in generation of AI
- b) Containing threat of misinformation generating by AI
- c) Promoting positive use in cyber operations led by AI

#### 6- Conclusion
