Exploited poor owing to weakened policies

Keep

Poor people in Pakistan have been exploited for many decades. The key reason is weakened policies which continuously suppress the poor. When any political party in Pakistan comes into power, they it takes those decisions for strengthening economic indicators, which favour the elite class and business class, not the poor. Therefore, poverty rate in Pakistan has reached 39.6 percent as per world Bank. Further, owing to mismanagement and useless policies, people are confronting skyrocketing inflation and unemployment rate. They have more been trampled and even they do not fulfil their fundamental needs. Thus, the poor people of Pakistan have been ill-treated because of useless policies.
