Title: "Balance of life in moderate climates and tropics"

Cold climate is essential for stimulating energy in temperate countries of northern Europe. However, extremes of cold and hot climate ^{make} a man indolent. In intense cold climate, man becomes immobilized while ~~intense~~ hot climate leaves little cause for exertion. However, moderate ^{temperature} ~~temperatures~~ ^{keeps} ~~made~~ man engaged in hopeful struggles to protect himself from cold weather. These struggles ^{include} building a house, ~~digging a coal out of the earth,~~ ~~cut down trees for fire and so on.~~ ^{Moreover,} in tropics, weather demands little struggle of warm clothes, fire, ^{necessities of life} and fruits and vegetables to sustain life. ^{different} However, one must recognize same difference at different seasons.

of the year ~~and between~~ as it is
between climes and tropics. Life is
feasible to live in hot weather while
cold climate needs more exertion
of minds and bodies.
