1	Topic: Astigicial intelligence: Its psomise and pesils Introduction: Thesis statement: Astigicial intelligence has emerged in postance in the modern world.
	thesis statement: Astigicial intelligence has emerged
	thesis statement: Astigicial intelligence has emerged
/	as a technology of pasticular
/	as a technology of pasticular
/	as a technology of pasticulas
/	monstages in the modern world
	III WILLIAM C III IIW IIIVIII INDONE I
	It is transpring the way
	of life, making the human tasks
- 4	y vige, mercing the million was those
	pasies and fastes, Howeves, where
	the global community seeks to
	Neverage the promises of AI,
orten tr	gse a little also consumted with
	the peaks of AI. But the
	visks of At are manageable
	with certain adaptation and
	nitigation meetanisms.
	- Role of AI in transforming
	the lives of human beings
1	- Astigicial intelligence as an
	oppostunity gos the modern
- 4	vorld
- 4	a- AI is sevolutionizing the
- 6	nuch needed healthcase system
	much necessary newscare system
6	AT is contributing towards
	the mitigation of chimate
	change
	- Decrease in the ratio of
	unemployment though AI
a	1- contribution in the development
	of ginance sector
	2 AI is playing a key

senewable energy f. A sevolutionary sectors g. A sealty change in the education sector 4. At as a potential threat to the global community a tack of data purpor usian at tools b. the sear of social surveithance with at technology c. Jab posses ove to at automation d. Social manipulation (public opinion manipulation (public opinion manipulation) through At algorithms e. the increasing gutta af bias in the society f. Lethot automobius weapons powered by At s. Adaptation and mitigation measure to tackle the threats of At a. Milization of natural human strik b. Protection against At control expectations of publicy in At d. Asond bias in At using bias mitigation techniques b. Conclusion techniques b. Conclusion		energy sector especially
g agriculture sector g A healty change in the education sector 4. All as a potential threat to the global community a tack of data purpos using At books b the gear of social surveillance with At technology c tob posses due to At automation d social manipulation (public opinion manipulation) through At algorithms e the menasing garts of bias in the society f tethet automation weepons powered by At scheller automation threats of At threats of At a thilipation of natural human stalk b Profection against At anabled expectationis of publicy in At d Resord boas in At using bias mitigation of publicy in At d Resord boas in At using bias mitigation of publicy in At d Resord boas in At using		iona rable populari.
education sector 4. At as a potential threat to the global community a talk of data puyary using At books b. Are gear of social susceptance with At technology c. Job passes due to At automation d. Social manipulation (public appoint manipulation) through At algorithms a the society price in recasing garter of bias in the society f. Lettal: automation weepons powered by At S. Adaptation and miligation measure to tackle the threats a thirtyalian of patriol human skills b Protection oggingt At analysis d. Asord bias in At using bias miligation f. Reservation of patriols human skills h. Robection oppingt At analysis d. Asord bias in At using bias miligation techniques		g. A devolubonory Rechnology
education sector 4. At as a potential threat to the global community a talk of data puyary using At books b. Are gear of social susceptance with At technology c. Job passes due to At automation d. Social manipulation (public appoint manipulation) through At algorithms a the society price in recasing garter of bias in the society f. Lettal: automation weepons powered by At S. Adaptation and miligation measure to tackle the threats a thirtyalian of patriol human skills b Protection oggingt At analysis d. Asord bias in At using bias miligation f. Reservation of patriols human skills h. Robection oppingt At analysis d. Asord bias in At using bias miligation techniques		est agriculture sector
education sector 4. All as a potential threat to the global community A Lack of data purpor using Al tools using Al tools b. He gear of social surventiance with Al technology c. Job passes due to Al automation A social manipulation (public appoint manipulation) through Al algorithms price in the society f. Lettel automation gentle are society f. Adaptation and mitigation measure to tackle the threats of Al altitization of natural human skills b. Protection against Al enabled cyberattacks c. Anservation of publicy in Al d. Avoid bias in Al using bias mitigation techniques	•	a A hearty change
a lack of data purply a lack of data purply using Al tools b. the gear of social surveillance with Al technology c- Job posses due to Al automation d- social manipulation (public appoint manipulation) through Al algorithms e- the increasing garter of bias in the society g- lether automation weepons powered by Al s- Adaptation and mitigation measure to tackle the threats of Al a- Utilization of pulvust human skills b- Protection against Al analyted cyberatlacks - Reservation of pulvacy in Al d. Arond bias in Al using bias mitigation feethiques		advertish 100+01
a lack of data purply a lack of data purply using Al tools b. the gear of social surveillance with Al technology c- Job posses due to Al automation d- social manipulation (public appoint manipulation) through Al algorithms e- the increasing garter of bias in the society g- lether automation weepons powered by Al s- Adaptation and mitigation measure to tackle the threats of Al a- Utilization of pulvust human skills b- Protection against Al analyted cyberatlacks - Reservation of pulvacy in Al d. Arond bias in Al using bias mitigation feethiques		4. RI as a potential enteat
b. The gear of social susceillance with AI technology c. Job posses due to AI automation d. social manipulation (public opinion manipulation) through AI algorithms e. He increasing queta of bias in the society g. Lettak automorphus weapons powered by AI S. Adaptation and mitigation measure to tackle the threats of AI a. Utilization of natural human skills b. Protection against AI enabled explesiolatics c. Preservation of pulsary in AI d. Asord bias in AI using bias mitigation feetingues		to the global community
b. He gear of social subsequence with AI technology c. Job losses due to AI automation d. Social manipulation (public opinion manipulation) through AI algorithms e. He increasing garth of bias in the society g. Lettate automorphus weapons powered by AI S. Adaptation and mitigation measure to tackle the threats of AI a. Utilization of natural human stalk b. Protection against AI enabled experiation of pulsary in AI d. Asord bias in AI using bias mitigation feetingues		a- Lack of data purpoy
c. Job posses due to AI automation d. Social manipulation (plublic opinion manipulation) through AI algorithms p. He increasing greets of bias in the society f. Lettel autonomius weapons powered by AI 5. Adaptation and mitigation measure to tackle the threats of AI a. Utilization of natural human skills b. Protection against AI anabled cyberattacks c. Reservation of privacy in AI J. Aroid bias in AI using bias mitigation techniques		using At tooks
c. Job posses due to AI automation d. Social manipulation (plublic opinion manipulation) through AI algorithms p. He increasing greets of bias in the society f. Lettel autonomius weapons powered by AI 5. Adaptation and mitigation measure to tackle the threats of AI a. Utilization of natural human skills b. Protection against AI anabled cyberattacks c. Reservation of privacy in AI J. Aroid bias in AI using bias mitigation techniques		b. The gear of social survey inches
automation d- Social manipulation (plublic opinion manipulation) through At algorithms e- the increasing gartin af bias in the society g- testal automatous weapons powered by At s- Adoptation and mitigation measure to tackle the threats of At a- Utilization of natural human stalk b- Protection against At enabled expecuation of pulsacy in At J. Asoid bias in At using bias mitigation techniques		with Al technology
d-Social manipulation (plublic opinion manipulation) through AI algorithms e-He mereasing garter of bias in the society g-testel autonomous weapons powered by AI 5-Adaptation and mitigation measure to tackle the threats of AI a-Unligation of natural human skills b-Protection against AI enabled experiations of pulsary in AI d-Avoid bias in AI using bias mitigation techniques		c- Job posses due to per
opinion manipulation to sough At algorithms p- the increasing garter of bias in the society g- bettet autonomous weepons powered by At 5- Adoptation and mitigation measure to tackle the threats of At a- Unitzation of natural human stalls b- Protection against At enabled expectation of pidacy in At d- Asord bias in At using bias mitigation techniques		automation ! I live to white
AI algorithms e- He increasing garty of bias in the society g- Leftel autonopous weapons powered by AI 5- Adaptation and mitigation measure to tackle the threats of AI a- Utilization of natural human skills b- Protection against AI anabled eyberattacks - Meservation of pylacy in AI J- Avoid bias in AI using bias mitigation techniques		d- Social manipulation (public
bias in the society g- Lethele autonophus weeppres powered by AI 5- Adaptation and mitigation measure to tackle the threats of AI a- Utilization of natural human skills b- Protection against AI enabled experiation of privacy in AI J- Revoid bias in AI using bias mitigation techniques		opinion manipulation assugr
powered by AI S-Adaptation and mitigation measure to tackle the threats of AI a-Utilization of natural human skills b-Protection ogainst AI enabled eyberattacks - Reservation of pulacy in AI J-Avoid bias in AI using bias mitigation feetniques		At algorithms and a
g- Lettek autonogous weepons powered by A.I 5- Adaptation and mitigation measure to tackle the threats of A.I a- Utilization of natural human skills b- Protection ogainst A.I enabled eyberattacks - Meservation of privacy in A.I J. Avoid bias in A.I using bias mitigation techniques		0- The merchany green in
s- Adaptation and mitigation measure to tackle the threats of AI n- Utilization of natural human skills b- Protection against AI enabled cyberattacks c- Russervation of pulsacy in AI d- Rusid bias in AI using bias mitigation techniques		bias in the society
measure to tackle the threats of AI a- Utilization of natural human skills b- Protection ogninst AI enabled eyberattacks - Preservation of privacy in AI d- Avoid bias in AI using bias mitigation techniques		f- letter manning
measure to tackle the threats of AI a- Utilization of natural human skills b- Protection ogninst AI enabled eyberattacks - Preservation of privacy in AI d- Avoid bias in AI using bias mitigation techniques		powered by and mitigation
threats of AI a- Utilization of natural human skills b- Protection against AI enabled epherattacks - Preservation of privacy in AI d- Avoid bias in AI using bias mitigation techniques		
a- Utilization of natural human skills b- Protection against AI enabled eyberattacks e- preservation of privacy in AI d- Avoid bias in AI using bias mitigation techniques		
skills b. Protection against A1 enabled eyberattacks e. Preservation of piriacy in A1 d. Avoid bias in A1 using bias mitigation techniques		million of patural human
b- Protection against A1 enabled eyberattacks - Reservation of privacy in A1 d- Avoid bias in /A1 using bias mitigation techniques		a- anyacion is
eybetattacks e- preservation of privacy in AI d- Avoid bias in AI using bias mitigation techniques		
d. Avoid bias in Al using bias mitigation techniques		D- Povicion Cy
bigs mitigation techniques		- processation of organi in A.I.
bigs mitigation techniques		1 Quoid bias in 191 isona
6- Conclusion		
U- CUITAINI	-	6 Conclusion
