emails

Similarly, Pakistan's education system has poor facilities. Many schools have lack of basic facilities. These facilities can be considered as clean drinking water, proper toilets, and electricity.

The school education department reports 80% of schools have no basic facilities for children. In rural areas, more than 50% of schools have no electricity. Students are studying at high temperature. This not only affects the quality of education but also poses a threat to the health of students. Thus, these basic needs lead towards poor facilities in Pakistan's education system.

"Lack of Training of Teachers regarding Practical Skills"

Teachers also have lack of training regarding practical skills. They teach student on the basis of theory only instead of preferring practical skills as well. Because they are ^{also} not well trained about practical skills. Practical learning helps students to learn more efficiently; but only if teachers are able to educate students with practical examples. For instance, if teachers is teaching concept called 'Types of matters in our surroundings', then they should ~~also~~ give practical examples of solid, liquid and gas. Thus,
