

Topic: AI has overstepped its bounds

~~OUTLINE~~

Work on paper presentation

1. Introduction

Thesis Statement

Artificial (AI) ^{+ Intelligence} has overstepped its bounds, recently by breaching the privacy and threatening the security of masses. It can pose serious repercussions on mankind by impacting their social, financial lives. By devising ethical framework globally, ~~Artificial Intelligence~~ AI can be restricted to its limits.

2. How AI is sneaking in human lives?

3. Reasons that AI has overstepped its bounds,

a. Privacy and security breach

b. Jobs displacement due to automation and AI

c. Spread of manipulated content

i.e. deepfakes of famous personalities

d. ~~Assists in~~ ^{er} Generation of technical misinformation i.e. hallucinations

e. ~~Hinders~~ the productivity of students by easing them through chatGPT.

f. ~~Posing~~ ^{er} risk to the democratic values

4. Repurcussions faced by humans amid AI overstepping its bounds,

- a. Widened social gaps due to spread of manipulated content
- b. Humans are losing control over

AI

- c. Health risks due to wrong diagnosis of diseases

- d. Atrophy of essential human abilities

- e. Algorithmic bias emulates gender discrimination

- f. AI-driven military technology can result in catastrophe

- g. Threatening effect on already dest damage climate of Earth

5. How AI can be restrained to its bounds,

- a. Ethical Framework: Devising ethical guidelines at global level

- b. Transparency and 'Responsible AI' must be promoted

- c. Introduce Programmes and Awareness about use of AI

- d. Accountability of AI developers and organizations

6. Conclusion

There will be abuses of power that involve AI, just as there will be advances in science and humanitarian efforts that also involve AI. Unfortunately, there are certain trends lines that can likely ~~to~~ create massive instability (Dana Boyd). The writer stresses

that abuse of any power which involves AI can result in massive instability and destruction. Likewise, Artificial Intelligence poses serious implications when it will surpass its boundaries.

It is important for anything to be in limits for reaping its maximum benefits. The reasons which proved that AI has overstepped its boundaries like ^{for instance,} ^{breach of privacy} ^{informal} and threatening of security of mankind.

It is involved in jobs displacement, creation of manipulated content and hindering in the way of productivity of students, rusting their analytic thinking. Serious repercussions might be faced by humans due to out of control of AI. Societies might face widened social gaps,

escalation of gender discrimination and threatening and damaging effects on climate, which would ultimately impact human health. Thus, AI has overstepped its boundaries, recently by breaching privacy and security of masses. It can pose ~~an~~ serious repercussions on mankind by impacting their social and financial lives. By devising ethical guidelines globally, AI can be limited to its boundaries.

Understanding of topic is good but it is equally important to express it in terms/POV of topic statement
