

# Expanding Artificial Intelligence: A Curse or Blessing

Date 19.09.2023

## Outline

### 1. Introduction

A. Emergence of artificial intelligence in the 21st century

### 2. Understanding Artificial Intelligence

A. Emergence of ChatGPT, Bard

### 3. Describing How Expanding Artificial Intelligence Is a Blessing

A. Cure the incurable disease  
Case in point: WHO report on A.I's potential

B. Ability to save precious human lives

Case in point: US-Mexican border

use of A.I dogs

C. A tool of time saving for professionals

- Researchers, Academics, Students,

Lawyers, Doctors, Mathematicians

D. Ability to perform repetitive tasks

E. Performance of hectic tasks

- Data Analysis

F. Bridges the language barrier

Case in point: ChatGPT Platform

by OpenAI

G. Ability to resolve climate related problems

Case in point: Integration in disaster

management of Japan

H. Capable of helping in industry growth

Case in point: Pew Research 2022

I. Enhance military capabilities of a country

Case in point: USA's AI run robots in war-zones.

J. Ability to reduce automobile accidents

Case in point: AI powered road brakes in cars.

#### 4. Artificial Intelligence As a Curse - a Counter Perspective

A. Risk of massive job displacement

Case in point: Yuval Noah Harari's research article

B. Compromising sensitive personal and state information

Case in point: US elections of 2016

C. Threat of disinformation

Case in point: Information of Maulvi Tamizuddin case on ChatGPT

D. Over-reliance detrimental for mankind

#### 5. Conclusion

The world today is experiencing rapid developments and inventions. Among those are is an invention, that has amazed the world, it has done so by its - super intelligence. It is none other than artificial intelligence, which has revolutionized the every field of science, economy, and development. Its ability to perform repetitive tasks and its access to vast data and information is the reason for emergence of artificial intelligence in the 21st century. It is being renowned the biggest achievement of late 21st century by Forbes magazine. It is because of its the numerous blessings that come with the expansion of AI. These mainly include its ability to save precious human lives, time, and money. Moreover, it can bridge the gap of languages barriers and resolve climate related problems. Nevertheless, AI does has some curses attached with it, which mainly include a threat of job displacement, threat of disinformation and data leaking sensitive information. The essay will establish that expanding A.I is a blessing in various manners, and will provide some minimal yet exaggerated
