

Sub heading

Nuclear Challenge to world peace during the 21st century.

Intro.Sentence

During the 21st century, world peace is in danger because of the most destructive nuclear weapons.

Expl.Ex.

Every country of the world ^{is} ~~are~~ connected socially, economically, politically and religiously with the other. Any war can turn into a nuclear war.

Supportingsentence

nuclear weapon are the common enemy of the humanity. Its radiation would travel from one country to other without the sense of boundary, and cause catastrophic effects on human health and environment.

Example

if a explosion occur, not a full war, it produced plasma ball hotter than sun, would meltdown and evaporates everything that come under its range in 2 km. Thermal pulse, produced from detonation site, would burnt everything that can be burn in the range of 13 km. Then its radiation, will remain in atmosphere hundreds of thousands of years, (Kurzgesagt - In a nutshell / what if we nuke a city / oct 2019 / You-tube)

Concluding Hence, small mistreatment could
bring catastrophic in world, and prove
fatal for peace.

Shayista

Nuclear Challenge to world peace

Topic

During the 21st century the biggest challenge to the world peace is nuclear challenge.

Explanation

In past few years, the leaders of the world again explicitly and publicly threatening each other with nuclear weapon. The countries of the world are interlinked with each other any war would turn into a nuclear war.

Supporting

As per international campaign to abolish nuclear weapons report, a single nuclear weapon can destroy a city and kill thousands of thousands people in seconds. The radiation of that explosion can harm to human as well as climate. It reduced the level of O_2 and increase CO_2 in air.

Example

As per ICANW since 1945-1980 2.5 million people died due to cancer that caused by the nuclear weapon testing.

Concluding

This is story of single explosion, if full war state, then it destroy human world regardless of boundaries.
