Manto's views on Social Ambivalence

The dual attitude of the society affected Manto adversely. His critics labelled him as vulgar and questioned him over ethical standards of his writings. But, he remained firm in his goal of unveiling dark realities of life. He tried to demonstrate secrets of sex in real terms while having sympathy for victims. He sees man as a human with both angel and devil characters. He was aware of differences in reality and appearance. The dual human behaviour annoyed him more. However, he observed them with no any discrimination. His artistic talent is reflected in his covertly mentioning vulgarity which is sensed suitable.
