

Youth Bulge in Pakistan: an asset or a liability.

OUTLINE

(1) INTRODUCTION:

Youth bulge is becoming an asset is crucially dependent on the youth being literate, trained and employed. If they are not, which is the case of Pakistan, it leads to a liability rather than an asset.

(2) Understanding the phenomenon of youth bulge.

(3) Youth bulge and the current social, political and economic situation of Pakistan.

(4) Increasing illiterate and non-skilled youth is a liability for Pakistan (Thesis)

(a) Non-employed youth affect national economy

(b) High population means high demands — causing inflation

(c) Increased crime rates; effects on social image of Pakistan

(d) Increasing recruits for militancy in Pakistan.

(e) Wrong mobilization of the youth by the political leadership; creating chaos and unrest

(5) Youth Bulge in Pakistan is an asset for socioeconomic growth and innovation (Antithesis)

(a) Foreign remittances by youth; a huge contribution to Pakistan's economy.

- (b) Increased contributions of youth in services sector
- (c) Involvement of youth against global warming; Afforestation through Billion Tree Tsunami Project.
- (d) Services during Covid 19; Tiger Force.
- (e) Pakistani youth and increased political participation.
- (6) Youth bulge in Pakistan is more a liability than an asset. (Synthesis)
- (a) Economic growth is difficult with a huge percent of unemployed and unskilled youth.
- (b) High population required ~~the~~ more contributions of the youth to meet the demands
- (c) Co-relation between illiteracy and ignorance; illiterate mind can easily manipulate by extremist ideologies.
- (d) Socio-economic inequalities leads to violence and unrest.
- (e) Post truth Politics and the youth of Pakistan.
- (7) Way Forward.
case study of Germany.
- (8) Conclusion.
