

# Corona VIRUS (COVID-19)

In march 2020, I came back to university and switched on the tv. There was shocking news wandering on different news channels. The news was about virus which had been spread in country since february. The name of the virus was corona virus. Then something clicked my mind that everyone was in the university were feeling low, coughing and sick. The fact was that I was unaware of the virus named corona. Corona was deadly virus which is contagious. It spreads from one person to another person. The symptoms of virus was cough, fever, fatigue and on

severe level, breathing difficult  
Everyone was trying to  
save themselves from this  
deadly virus. The disaster  
was that it did not have  
any medicine, remedy or  
vaccine to ~~fight~~ fight  
against this virus. The  
doctors ~~were~~ <sup>gave</sup> ~~only~~ ~~giving~~  
precautions to people like  
~~wearing masks~~ wore masks,  
stay away from person who  
is showing any symptoms.  
The government also imposed  
law and order, strict  
fine on people if they  
were not wearing mask.  
To conclude, it was bad  
time but bad time pass  
on, Pakistan beat it efficiently.
