Paragraph writing.

High Investments in ill-Economy:

High investments are going to be poured in crippled and ill economy of Pakistan. Recently, army chief Asim Munir claimed that Gulf countries were about to invest billions of dollars in various sectors of Pakistan while protesting ^{of business tycoon} about hiked energy prices. Both interim government and security establishment gave hope to the nation of Pakistan about investment; despite the fact that domestic investments are bearing down on. In fact, it is impossible to invest billions of dollars in the crumbling economy. Furthermore, investors do not ever invest billions of dollars in the country in which there is not security guarantee and economy is suffering disabilities of economics. Therefore, in ill economy, heavy investments are about to be invested.
