

## (Assignment) Essay

Sub heading : Nuclear challenge to the world during the 21<sup>st</sup> century.

**Topic sentence** : Nuclear weapons are the most compelling challenge to the humanity and world peace during the 21<sup>st</sup> century.

**Explanatory sentence** : Inhuman nuclear weapons are capable of causing unspeakable human suffering and there is no way to control how fast the radioactive effects will be.

**Supporting point** : A single nuclear weapon can destroy a city and kill most of its people. The bombings of Hiroshima and Nagasaki are prime examples of the fatality caused by an atomic bomb.

**Example** : Dr Marcel Junod in Hiroshima in 1945 assessed the effects and reported that thousands of human beings in the streets and gardens in the town centre, struck by a

wave of intense heat, died like flies. Others lay withering like worms, atrociously burned. All private houses, warehouses, etc, disappeared as if swept away by a supernatural power. Every living thing was petrified in an attitude of acute pain. (Nuclear weapons - an intolerable threat to humanity, August 2018).

**Conclusion** : In this way, nuclear challenges may pose serious threat to world peace in the 21st century.
