

Reluctant to adopt innovative ways of teaching & learning

Teachers and administrators in Pakistan follow obsolete methods in education system and are reluctant to adopt innovative ways. They do not see any problem in using traditional methods. Only a handful of professionals question the status quo and are mocked and humiliated in response. Resultantly, they are leaving the country, finding no hope for any change. About 900 such highly qualified professionals left the country and joined prestigious foreign institutes last year alone (Dr. Irfan Ahmed Rind, Stagnation of teacher education in Pakistan, Aug. 2023). It shows that ~~Pakistan~~ the teachers and administrators in Pakistan are still adherent to the older methods and do not allow any room for innovations, losing competitive professionals.

Sub Topic :- Challenge of Using AI Irresponsibly

The irresponsible usage of AI these days poses a great challenge to privacy and security of personal data. This is because none of our activities on social media platforms is beside the screen for AI. Different companies use this data for their own purposes. For example, Facebook and Instagram use this data to show relevant content to their users. Although, this data is not always used negatively but it is done without the consent of users. It was found that

and knowledge
Clearview AI scraped 30 billion images from Facebook without the consent of users and gave them to cops which were later used in facial recognition software, (Katherine Tangalakis, AI Puts Everyone to Perpetual Police Line, 2023). Hence, AI can be dangerous if used irresponsibly.
