Social media platforms are generally considered as the safe zones for people of all ages to socialize, in recent times it has been the main reason behind a missing person. And ~~this~~ this is also true, for the youth of Pakistan, upto same extend. There is a trend uprising in some parts of the southern province Sindh in which the kidnappers exploit the presence of youth on different social media platforms. According to a short video documentry, posted on their youtube page, by BBC News اردو, a young person rescued by the Ghotki police said,"he was approached by an account on the social media pretending to be a girl, but was ~~trappe~~ honey trapped & later kidnapped for ransom money". In conclusion this incident creates the need of a program for online safety for our youth.
