

# "Pros and Cons of Artificial Intelligence"

## Outline

### I- Introduction:

Artificial intelligence (AI) offers a variety of advantages but they come with a cost. Nevertheless, with certain measures, the cons of AI could be reduced.

### II- Understanding Artificial Intelligence

### III - Advantages of Artificial Intelligence:

- A. Offers a variety of educational tools
- B. Provides services in health sector
- C. Able to solve complex issues
- D. Performs tasks which humans cannot
- E. Works without breaks and interruption
- F. Aids in manufacturing sector
- G. Provides transportation facility and ease

### IV - Disadvantages of Artificial Intelligence:

- A. Risk of unemployment
- B. Too much reliance would make humans lazy
- C. Prospects of big errors
- D. High cost installation
- E. Absence of empathy - emotionless
- F. Risk of data breach - security threat

### V - Ways forward to reduce disadvantages of Artificial Intelligence:

- A. More human - AI collaboration needed
- B. Installation of state-level mechanism to counter security threats
- C. Awareness by civil society on use of AI
- D. Promotion of limited reliance on AI

### VI - Conclusion:

To delimit the consequences of AI, society needs to understand, collaborate and interact more with AI.

# 1. "Humans' alienation from their own selves" (Simple exposition, all-times, global space)

## Outline

I- Introduction: Humans' alienation from their own-selves impacted humans as individual, society and global community. The causes of alienation lie in basic foundation of socialization i.e. parenting. However, impacts could be lessened only if humans start realizing their true-selves.

II- Understanding self-alienation

III- Humans' alienation from their own selves:

- A. Alienation from self-conscious
- B. Unable to realize self-likes and dislikes
- C. Unaware of self-potential and abilities
- D. Depersonalization - detachment from own emotions

IV- Humans' alienation from their own selves - the causes:

- A. Flamed nature of parenting
- B. Schools unable to identify child's true potential
- C. Peer pressure molds a person
- D. Societal expectations lead to self-alienation
- E. Role of media in shaping personalities

## V- Humans' alienation from their own-selves - the impacts:

### A. Individual level:

1. Persistent struggle to be happy and depression prevalence
2. Issue of split personality
3. Making irreversible bad choices

### B. Societal level:

1. Birth of materialistic society - Rousseau's theory

2. Alienated humans formed a selfish and power-hungry society

### C. Global level:

1. Pursuance of national interests only

## VI- How humans can connect from their own-selves - Way forward:

A. <sup>By</sup> Changing traditional methodology of parenting

B. Adoption of vocational education

C. Civil society must create awareness on how to connect

VII- Conclusion: The materialistic society has roots in humans alienation from their own selves. Efforts in the right direction are needed to reduce this alienation and becoming a progressive society of happy humans.
