Negative Impacts of Social Media on Youth

Topic Sentence One of the negative impacts of social media on youth include rumor spreading.

Explanatory Sentence The reason is that youth spend significant amount of their time on reading the comments of irrelevant people related to specific topic or concerned personality.

Supporting point 1 Rumor spreading as a basic mechanism for information on social media network affects people's life immensely.

Example Qihui Pan in Journal of Physics: Conference Series (2020) proposed that controlling rumor propagation is beneficial when controlling the influence of those who are convinced of rumors and those who hold an objective attitude rather than constraining ^{one} of them individually.

Conclusion Thus, it shows that negative rumor spreading could also cause negative effects on youth via social media networks.
